

Leikkaa haluamasi kuvat irti, asettele kankaalle ja värjää tausta sumuttamalla tai töpöttämällä tai leikkaa kuvioiden muotoisia aukkoja kontakti- tai muuhun muoviin tai kartonkiin ja töpötä aukot vaahtomuovista kierretyllä töpöllä tai jäykällä töpötyspensselillä. Käytä samasta väristä eri tummuusasteita, niin kuviin tulee muotoa ja elävyyttä.

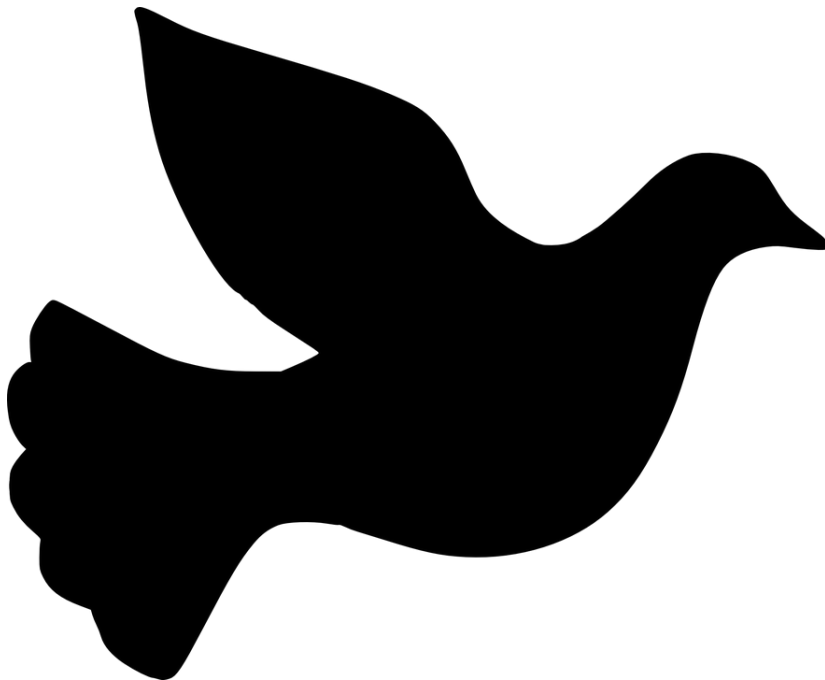

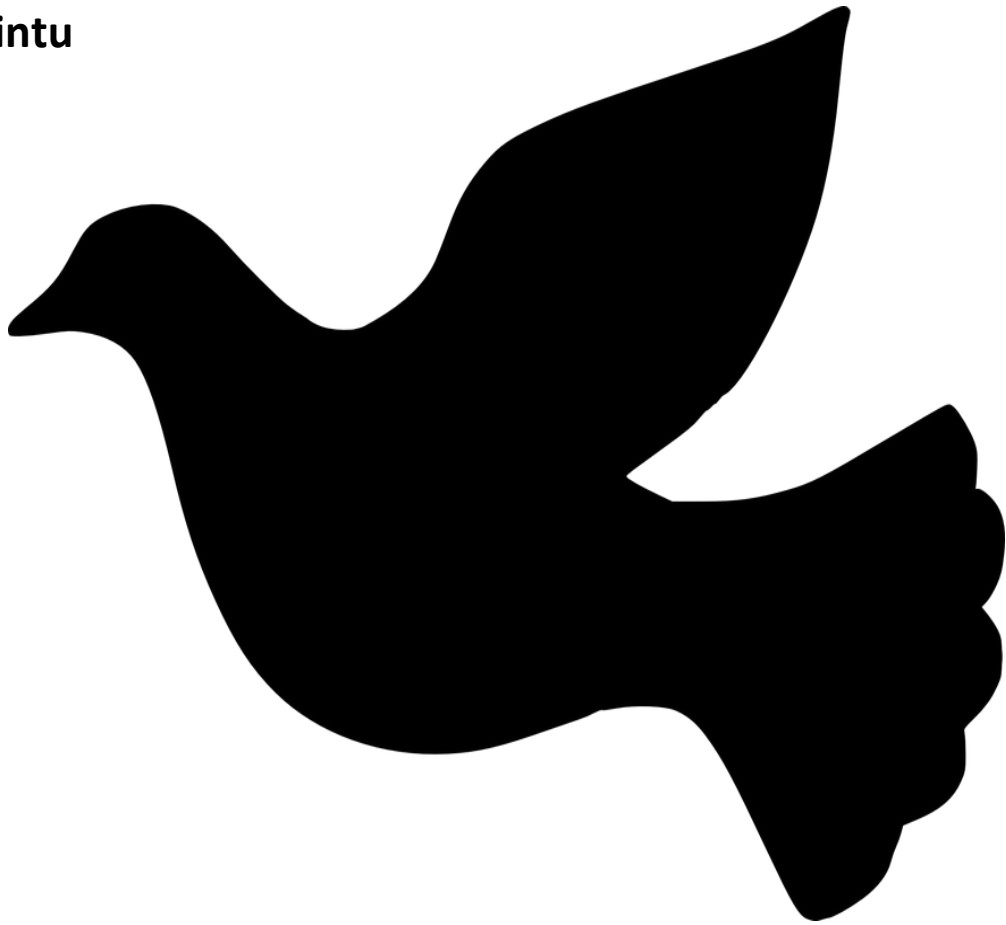

Saksilla saa leikattua karkeammat linjat, mutta pienet yksityiskohdat onnistuvat parhaiten kirurginveitsellä (apteekista; kuva>), mattoveitsellä (kuva>) tai katkoteräveitsellä (kuva>) lasilevyn päällä leikaten.
